About Us

We at Interstate would like to thank you for considering our vinyl fence line: *Visions*. Proudly made in the USA, Interstate is a member of the American Fence Association and has supplied fence contractors throughout the North-East with superior products since 1987. All of our vinyl fences are backed by our limited lifetime warranty.

At Interstate we are committed to and have a great understanding of our industry and to the needs of the homeowner. We recognize that purchases for the home are emotional, and that homeowners are searching for the greatest value for their hard-earned dollar. *Visions* PVC fence line by Interstate brings value-added products that are manufactured, engineered, and tested to last!

WHAT MAKES US BETTER?

Mid-Rail

All privacy styles with a topper are manufactured with a 2" x 6" double-ribbed mid-rail. This mid-rail with its ridge design is a key ingredient for Interstate's interlocking fence section.

Interlocking Panels

Visions by Interstate is the market's one and only fence section that its interlocking feature incorporates the vertical boards locked into place within the bottom and mid rails. Our patented 2" x 6" rails have a ridge feature that allows this interlocking feature to reduce sections from knock-out and wind blowouts.

Bottom Rail

The foundation to all of our PVC sections is our patented 2" x 6" heavy duty bottom rail with an internal steel support. This rail also features a ridge design for interlocking ability. The increased structural strength of this rail reduces sagging, premature failure, and damage from wind.

Gate Frame

PVC gates have always been a weak link within the vinyl fence industry. All of our gates are manufactured using our patented 3½" x 3½" gate master frame. This honeycomb design is structurally stronger than that of our competition's hollow or narrow gate frames. Additionally, its double-walled feature enables hardware screws to penetrate two layers of the frame, making for stronger connections and reducing screws from pulling out. Bottom line: our gates last longer!!

Gate Stop

This positive stop, patented by Interstate, is an additional piece of gate hardware that you will only find with our system. This stop is an insurance policy for all gates as it absorbs the violent act of gate slamming and many times protects against the resulting stress fractures and gate failure.

(Included with every Walk and Drive Gate)

Privacy with toppers

The Oklahoma Series is Interstate's signature privacy fence line. Most commonly installed along rear and side perimeters, the selection of one of these styles allows for homeowners to enjoy their backyard just like one of the private rooms in the residence.

The construction of the Oklahoma Series features a privacy tongue and groove base that can stand on its own for maximum privacy. This style offers many variations and is available with the addition of both lattice and spindle topper designs. All of Visions fence styles are available in four colors: white, tan, adobe and gray; and standard heights ranging from 3 to 6 feet.

We at Interstate encourage customizing, and open the door to personalize your fence by offering sections with multiple colors and unique designs drawn up by homeowners.
